ADA codes (also known as "Dental Procedure Codes") are numerical codes that are used by insurance companies, dentists and government agencies to help ensure consistency in dental records. There is a code for every dental procedure, and the codes are used nationwide.

EXAMPLE CODE

ADA CODE **D1110** ADULT PROPHYLAXIS

more commonly known as a cleaning

Dental procedures associated with each code are listed on your fee schedule under the "Description" column. When your dentist tells you what treatments you need, you can ask for the ADA codes. If your dentist provides you with a treatment plan, the codes for each recommended procedure will be listed. The **reduced fees that you pay for each procedure** are listed in the right-hand column, underneath the type of service.

Healthy Smile, Healthier You!

Medical science continues to find important connections between oral health and overall wellness. Taking good care of your teeth and gums is critical to maintain optimal health. Follow the tips below and talk to your dentist or hygienist to learn how to keep your smile healthy and strong.

- 1.** Brush with a soft toothbrush, 2 minutes per mouth quadrant (top left and top right, bottom left and bottom right), at least twice a day.
- 2.** Floss daily.
- 3.** Limit sugar intake. If you do indulge in a sweet treat, avoid sticky or hard candies as they expose your teeth to sugar longer than a chocolate bar or similar snack does.
- 4.** Acidic drinks, such as fruit juices, may also damage teeth. Rinse your mouth with water afterwards. Avoid brushing immediately after drinking as the acid may temporarily soften your tooth enamel.
- 5.** Chewing sugarless gum helps promote saliva production, which assists in keeping your mouth healthy.
- 6.** See your dentist regularly for checkups & cleanings.
- 7.** **Use your plan! Every dollar spent on preventive oral care can result in up to \$40 in savings on future dental costs, according to the American Dental Hygienists' Association.**
